

Specialty Granular Fertilizer

Yara Mila Target (14.14.21)

Yara Mila target 14.14.21, is another great product of Yara International, specially introduced for the flowering and fruiting stage of floriculture crops, vegetable crops and fruit crops. It is a high Potassium granular fertilizer that is suitable for flowering plants including vegetables. High potassium and phosphors content will induce flowering, fruiting and it will maintain even fruit size and enhance the number of fruits. Nitrogen content will ensure the endurance of the cultivation.
